

L&J ENGINEERING PROJECT CASE STUDY

L&J Engineering have run hundreds of projects over the last 15 years. Our case studies represent just a few of the projects, with more to be added from time to time.

BMW Swindon

Supply and installation of 600m of 150mm stainless steel “Trubore” piping...

Project Description

Supply and installation of 600m of 150mm stainless steel “Trubore” piping for the group at their Swindon plant in order to feed cooling water to the robots on the assembly line. After the successful completion of this project our contract was extended for a further 3 months supplying on -site labour.

We also installed three new compressors, dryers, an air receiver and all the associated stainless steel pipework (65 to 150mm) in a new compressor house built by L&J Engineering.
